Christopher Threadgill

React Engineer

t: 479 502 3037   **e:** christopher.threadgill.code@gmail.com   Portfolio   Linkedin   GitHub

Skills

Javascript, React, Redux, HTML5, CSS3, jQuery, AJAX, Mocha, Chai, Github, Node.js, Python, SQL, postgreSQL, Express.js, Flask, Sequelize, SQLAlchemy, Socket.io, AWS, Heroku, Docker

Projects

NinaTrill Esthetics - *A multi-tier employee management application*   live site | github

 JavaScript, React / Redux, Express.js, Node.js, Sequelize, postgreSQL, HTML5, CSS3, Docker, Heroku

- Utilizes a custom built appointment scheduling algorithm that updates dynamically with employee schedule.
- User/Employee/Management role based authorization.
- Custom React component for scheduling time intervals by the half hour.
- Employee portal for managing services offered to customers including scheduling of services..

Komication - *Pixel Perfect Discord Clone*   live site | github

JavaScript , React / Redux , Python, Flask, SQLAlchemy, HTML5, postgreSQL, CSS3, Socket.io, AWS, Docker, Heroku

- Implemented a React.js application with private servers and channels.
- Continually emit channel messages, direct messages, and online status to all applicable users using Socket.io.
- Dynamic user search for starting a direct message.

Experience

Power Carrier Services | *JB Hunt Transportation* | September 2021 - June 2022

- Oversaw carrier requests on hundreds of high volume Power Carrier accounts, serving as liaison between contract stakeholders and relevant company teams, services, and power carriers.
- Maintained multiple reports within the company's proprietary software for multiple departments, providing accurate data and documentation as needed.
- Handled all correspondence with power carriers to provide necessary information and guidance to ensure proper resolution of any issues during transport.

Assistant Manager | *Plaza Tire Service* | March 2019 - May 2021

- Successfully opened the franchise's first store in Northwest Arkansas, averaging $200,000/mo in sales within the first year of business..
- Maintained an inventory of approximately 1,800 tires as well as 15,000 miscellaneous stock items.
- Completed weekly labor reports for 14 employees along with monthly inventory reports.
- Networked with multiple local distribution centers to outsource any inventory needs not met by stock.
- Conducted multiple daily stand ups for each shift to prepare employees for daily appointments/tasks.
- Handled all new hire onboarding/training according to company procedure and safety guidelines along with monthly meetings to ensure ongoing adherence, support, and maintenance of best practices.

Education

App Academy | January 2002 - June 2022 | New York, NY
Immersive software engineering course with focus on full stack web development

NorthWest Arkansas Community College | August 2021 - December 2021 | Bentonville, AR
Introduction to C++ Programming
